Patrician III is a very well balanced trading game, I followed it from the beginning when it was still Patrizier II in German, with an add-on later. The forum was overwhelming and explained the game in the smallest details. Everything works together, you just can't build workshops for instance without having the materials but also because you do not have enough workers, because they do not have a home. so I play this game for over 20 years now and when I stop, after a few years I restart it for the x-th time. Ten out of ten!. They sold their soul to Epic Games Store and are removing the game from Steam... The steam customers are the reason how they got to so much success and now they are betraying them. It's a good game but this is just sad and a bad decision on their side. I can't support this greed. \u2665\u2

\\(eebie should actually be a Free game.

What you do in this game is you toss a ball at a spinning stick. Hoping to get it to the other color (or colour). And that's what you do for the whole game. Oh and you get three lives. But, if you really into puzzle games and wanting something cheap... Here's your game. If IIf I saved my money, I could've spent \$5 at KFC, to buy chicken!

. Should've add more things. POSITIVE:

What can I say?

Quality. Aesthetics. Minimalism. Speed. Challenge. Skill.

I finally (I didn't want to since I didn't achieve Super Hexagon yet) bought it this morning, as well as David, Goscurry, Lovely Planet and Fotonica.

And wow. I thought it was fast. It's faster than fast, and really fun to play. If you have to go right but flip the screen before, you have to remember that you'll have to go left. It screw your sense of direction and gravity all the time, it's really, really fun. Really painful too.

In Super Hexagon, you have 3 levels of difficulty at first, and you can work on each individually. In Velocibox, you have 9 levels. Beware: IT DOESN'T INCREASE NICELY. This game isn't gentle. If you want all the achievements, you'll suffer. You'll have to finish each level 10 times. 1 is easy, it rarely beats me. 2 is not. 3 is hell. (I think in a few hours I'll say 3 is easy, like in every skill-based games)

If you like hardcore and fast-paced die-and-retry games, it'll fit.

NEGATIVE:

It's another of these no-depth games. It's clean, yes. But it's too much, I think. I play and I don't feel any universe, I don't feel anything that make this a unique game. It is well-made, yes. It is difficult, yes. But... I don't know, I find it lacks charisma.

I wanted to play it very badly and I din't want to wait a Steam sale, and I knew it could lack charisma and depth. So I don't complain, it's my choice, but I feel it's a 5-bucks game, not 8. Or a early-access game. The "Velocibox" voice is generic, the textures are not engaging, the cube you control is a generic cube, the music is not really original, and it gets really annoying long before you play level 1 for the 3400509034th time.

So. I was more or less aware of it before buying, but I'd advice that you wait it's on sale, and while you're waiting, you could take F-Zero GX outside his box, and plug again your old Gamecube.

But if you don't want to wait, don't wait, and you'll still enjoy one of the best arcade challenges of 2014. Gosh, for 2015 or 2016, I would really like a skill-based game with both the mind-r*ping style of Super Hexagon, the subjective view, some stupidness in it and an agony-style difficulty.. Coolio! Best Tennis game.. It never saves my game.... I've really enjoyed my first hour playing this. Would definitely reccomend it to anyone who likes Tell Tale's game or just zombies in general. The romance angle is something I've never seen before in a zombie survival game, very refreshing:). probably the best jrpg ive played. this guys video of Mind Unleashed is nearly as good as the game itself....

Howdy Doody,,,,,every Booty (wtf) My name is Kev Guuey (overbite kid)

I really enjoyed this game, and anyone who enjoys semi-casual puzzle platformers will like it a lot, as well. The main puzzles for completing the game to a bare-bones ending are not bash-your-head-against-a-wall difficult, while still maintaining a good level of both creative thinking, platforming, and satisfaction for solving. The music is stellar, the art is gorgeous, and the "story" is sparse.

Some minor issues: the controls feel a tad too floaty, hit-boxes are a bit too broad, and it took me over half an hour of avoiding any contact with Toragos before realizing that you can touch (ride) him without taking damage if you avoid the head. That last part could have been better demonstrated, because a gamer's instinct in a game like this is to not touch any part of the enemy, lest they perish.

I, for one, will not be 100%ing this game because it would take me WAY too long to find all the invisible keys, and that's not as fun as solving puzzles I can actually see. But for what it was, I really enjoyed it, and I might even play around with the level creator, and/or speed-running.

I recommend this very much, and look forward to future titles from MagicalTimeBean.. very good wallpapers and mods to do it youre self 5/5 and low price :))). Heaps of fun, difficulty level is good, not too hard, but hard enough that it makes you be strategic with your tower placements. Well worth the money, kind of sad it's finished :(More levels needed? :P. haha, I have no clue as to what I am doing, or suppose to do only item i found did anything was the flashlight. Some how I managed to make it outside only to drift off in space to my bitter death. Its a maze! If you like stranded deep, you will like this. So the game is fun a bit hard but not that you would rage just know how to control the downside for me is that i use an xbox 360 controller it works with controls but the menu doesn't
